SAFE IMPORT CHECK

The new ECM service for safe imports from China

1 What is it?

Safe Import Check is ECM's new service offering **pre-shipment inspections** and **customs support**, helping European companies import safely from China.

2 The Context

In recent years, **customs controls** have become stricter. Many European companies face delays and unexpected costs for non-compliant goods when importing.

Safe Import Check was created to support these companies and streamline the import process.

3 How Safe Import Check works

The service includes:

Pre-shipment inspection at the manufacturer or shipper to verify compliance

Checking documentation to reduce the risk of customs delays

Assistance with customs clearance, thanks to our experience and collaboration with the Customs Agency

4 ECM strategic partner for imports

ECM is the **ideal partner** for companies importing from China: professional, reliable and with over 20 years of experience in the field of compliance testing.

Thanks to our **ECM Shanghai office**, we are on site to ensure rigorous inspections and checks prior to shipment.

5 The advantages of Safe Import Check

- **Reduced risk** of delays and unforeseen events
- **Verification of compliance** with international standards
- Peace of mind with a **secure and comprehensive process**, from the Chinese supplier to customs clearance in Europe
